City's essential work proceeds

Steps taken to maintain safety

DAVE GONG | The Journal Gazette

Many aspects of daily life in Fort Wayne slowed to a crawl this spring as COVID-19 spread, but primary services provided by the city of Fort Wayne and City Utilities remain uninterrupted, thanks to efforts by teams of essential city employees.

City Utilities assures water plentiful to help wash away coronavirus

Kumar Menon

The safe, abundant water that comes out of our tap is something most of us take for granted. But as we deal with the COVID-19 pandemic, high-quality water is not only on top of our mind, it is a protector of life.

Health officials say frequent hand washing with soap and water for at least 20 seconds helps prevent the spread of COVID-19 and other infectious diseases. We urge each of you to follow this advice.

We are fortunate to have a plentiful supply of water in Fort Wayne. That's not the case worldwide, where 2.1 billion people lack access to safe, readily available water at home.

City Utilities is a highly decorated utility receiving numerous national awards for great-tasting, high-quality water, superior sewer service and a strong distribution system that supports more than 300,000 residents. But those accolades mean nothing if we can't be there for you in a time of crisis.

I can assure you that in this time of need the men and women of City Utilities are committed to continuing the highest level of operation to bring you safe water and to effectively treat sewage.

Our staff members are essential and remain on the job, 24 hours a day, seven days a week as we deal with the challenges of COVID-19.
