RESTORE SURFACE TO MATCH EXISTING ADJACENT SURFACE

PAVEMENT

REMOVE UPPER SECTION OF VALVE BOX

REMOVE LOWER SECTION OF VALVE BOX

CLOSE VALVE AND PLUG ANY HOLES IN THE ABANDONED MAIN

REMOVE HYDRANT AND CAP OR PLUG AT THIS POINT

The diagram illustrates the removal of a valve box from a street. It shows a cross-section of the pavement, the valve box structure, and the underground main. The valve box is divided into upper and lower sections. The hydrant and cap are shown at the top. The main is shown with a valve and a plug. The diagram includes labels for the pavement, the valve box sections, the hydrant, and the main. Arrows point to the specific locations where the sections are removed and where the hydrant and main are plugged.

1. FOLLOW CITY STANDARDS FOR BACKFILL AND COMPACTION IN DISTURBED OR EXCAVATED AREAS.
